Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

A;Description: Primary structure of the murine monoclonal IgG2a antibody mab735 against A;Reference number: 840295
A;Molecule type: protein
A;Residues: 1446 «KLE»
C;Genetics:
A;Map position: 12
C;Superfeamly: immunoglobulin C region; immunoglobulin homology
C;Reywords: disulfide bond; glycoprotein; immunoglobulin; pyroglutamic acid

SwissProt\_40:\* Датараве :

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                   US-09-758-173-12
